## Personal Projects

---

### Architecture Website — In Progress

Expected Nov–Dec/2025

- Developed a web application with 5 pages and a dashboard for content management with a team.
- Built using Laravel's core features, including routing, controllers, models, migrations, and layouts.
- Contributed in coding and design with AI tools used as development assistance.
- Project demonstrates ability to build structured, database-connected websites.

### BuildPro Website — Completed

Completed Dec/2025

- Designed and developed a modern, responsive portfolio website template for construction companies using Next.js 14 and React 18.
- Implemented smooth scroll animations with Lenis and Framer Motion for a better user experience.
- Created a clean, professional UI with reusable components, mobile-first responsive design, and a functional contact form.
- Deployed on Vercel you visit it using this link( <https://buildpro-construction-website.vercel.app/> ).
- Built independently with AI-assisted development.
